DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-41, 50-67 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 10/659,585. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both directed to the use of laminated barrier layer and copper film for wiring in semiconductor device.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2813

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-41, 50-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoshimoto.

Yoshimoto, figs. 10-17 and related text in paragraphs [0140]-[0200] teaches the claimed display device including a conductive barrier film 428a; and a wiring 428b containing Cu as its main component over the conductive barrier film 428a, wherein a width of a top surface of the conductive barrier film 428a is not aligned with that of the wiring 428b (fig. 10C, note in paragraph [0147], last two lines for the use of TaN as a barrier film 408 and copper as a wiring film 409).

With respect to claim 2, see fig. 11c wherein insulating film 461 covers top and side surface of the copper wiring 428b.

With respect to claim 3, a conductive film is considered as a lower portion of the conductive barrier film 428a; and the width of copper film 428b is narrower than that of the conductive barrier film 428a.

With respect to claims 4-18, 57-67, the TFT structure as shown in fig. 12 is used in various electro-optical apparatus (see figs. 15-17, paragraphs [0185]-[0200]) which inherently includes signal lines and scan lines formed in matrix to perform a certain function.

With respect to claims 19-32, 52-54, see paragraphs [0146]-[0147].

With respect to claims 33-41, 55-56, see paragraph [0158].

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Konuma discloses the wiring layer is narrower than that of the barrier layer.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Response to Arguments

Applicant's arguments with respect to claims 1-41 have been considered but are moot in view of the new ground(s) of rejection.
